Summary

Full-Stack Developer specializing in the MERN stack, with experience building scalable web applications and RESTful APIs. Proven ability to develop user-centric solutions, automate workflows, and integrate third-party APIs. Skilled in JavaScript, Git, and cloud deployment platforms such as Vercel. Active hackathon participant with strong problem-solving skills and a focus on performance and usability.

Skills

Programming Languages: Java, C++, C, JavaScript

Frameworks & Technologies: MongoDB, Express.js, React.js, Node.js, Next.js

Tools & Platforms: Git, GitHub, Vercel, Render

Core Concepts: RESTful APIs, API Integration, Authentication (JWT), Database Design, Responsive Web Design

Experience

Development Head

August 2025 – Present

Traversal (College Club)

Next.js, React.js, Express.js, EmailJS

- **Developed and deployed the official club website**, improving event visibility and enabling seamless event registrations.
- **Built an automated certificate distribution system**, reducing manual effort and enabling bulk certificate delivery in a single workflow.
- **Collaborated with cross-functional teams** to design and implement scalable features aligned with organizational goals.

Projects

TraversalHub – Official Club Website | *Next.js, Express.js, MongoDB*

November 2025

- **Developed and deployed the official website** for the Traversal technical club to showcase events, team, and initiatives.
- Designed a **responsive UI** and integrated animations to enhance user engagement.
- Implemented **event listing and detail pages**, improving content accessibility and user interaction.
- **Live:** traversalhub.in — **GitHub:** TraversalGEU/Traversal

SehatSathi – Medical Report Analyzer | *React.js, Gemini API, Sarvam API*

FOSS Hack 2026

- **Developed a React-based application** to analyze medical reports and generate simplified insights for users.
- Integrated **Gemini and Sarvam APIs** for intelligent data extraction and processing.
- Implemented **automated report summarization**, improving accessibility and reducing interpretation effort.
- Built during **FOSS Hack 2026**, focusing on rapid development and usability.
- **Live:** SehatSathi.app — **GitHub:** Ayushrf121/Foss-Hack2.0

Awards & Certifications

- **3rd Position – Ideathon Pitching Competition (2025):** Secured third place for presenting an innovative solution to improve travel experiences, focusing on efficiency and user-centric design.
- **Software Engineer Intern Certification – HackerRank (2026):** Completed role-based assessment involving real-world problem-solving tasks, demonstrating proficiency in software development concepts and coding skills.

Education

Bachelor of Computer Applications (BCA)

2024 – 2027

Graphic Era University, Dehradun

Pursuing
